

Selected papers from the 2021 AGOA Society

Dear Colleagues,

Every two years, Asociación Aragonesa de Ginecología y Obstetricia (AGOA) organizes a training session to bring together researchers and professionals who work in women's health.

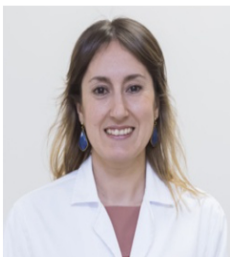

We look forward to receiving your support for this initiative. The objective is to update our knowledge in our area of work and advance in the diagnosis, monitoring and therapy of a variety of diseases and conditions. It is also a good setting to show the lines of research on women's health in our community.

This year the congress will be held from January 28 to April 16, 2021. The most important studies will be presented at the close of the conference in April. This meeting will be supported by the European Journal of Gynaecological Oncology. This is an international journal publishing studies in gynecology oncology.
