Dear Colleagues,

Enhanced recovery of gynecological oncology is of great significance, which is conducive to patients receiving supplementary treatment and returning to normal life as early as possible. Enhanced recovery after surgery (ERAS) covers almost every aspect of perioperative period of gynecological oncology.

In this special issue of the European Journal of Gynaecological Oncology, we focus on how to improve the quality of enhanced recovery of gynecological oncology, including surgery, anesthesia, nursing, nutritional support, psychological counseling, treatment of various complications, and other details, to promote the rapid recovery of gynecological oncology patients and return to normal life earlier. Here, we sincerely invite you to submit your original studies, meta-analyses, systematic reviews, bioinformatics analysis, and rare case reports related to enhanced recovery of gynecological oncology.

Key Words: Gynecological Cancer; Enhanced Recovery After Surgery; Minimally Invasive Surgery; Pain Management; Nutritional Support; High Quality Nursing; Psychological Counseling; Complication Management

Submission Deadline: 31 December 2022

Online Submission System: <https://js.ejgo.net/ch/author/login.aspx>
